# Trade Execution

Trade anonymously with any counterparty in the CLOB, Dark Pool, Aggregator w/ Smart Order Routing or RFQ platform

Schedule a Demo

BOSONIC

Features

- Central Limit Order Book (CLOB) for resting Limit orders and other displayed liquidity

- Dark Pool for hidden orders with price improvement against the CLOB and displayed liquidity

- Liquidity Aggregation and SOR that aggregates all market maker and third-party exchange liquidity into the CLOB and routes out for execution

- RFQ block trading platform for large off-exchange negotiated block trades with anonymity and two-way quoting as well as manual ticket entry for deals agreed off-platform

- Advanced order types

- Multi-asset support for Fiat, Crypto, FX, Derivatives and Digital Asset Securities

Benefits

- Trade anonymously with any counterparty

- Liquidity aggregated in one UI or API including any market maker, OTC desk, retail or institutional exchange

- Dark Pool has no visible book or trade ticker and helps prevent information leakage and price slippage eliminating or greatly reducing adverse market impact

- All-to-all trading including across all buy-side counterparties

- Advanced order types
